---

Systems engineer specializing in automation, documentation, and cross-functional leadership within distributed R&D teams.

---

## Profile

Multidisciplinary engineer with experience across software, hardware, and technical communication.

## Experience

### Lead Engineer, Omni Labs

- Designed end-to-end automation workflows for LaTeX publishing pipelines.
- Led a cross-functional team delivering multi-document template suites.

### Systems Engineer, Aurora Dynamics

- Built simulation models for guidance and navigation control.
- Authored technical reports and process documentation.

## Education

- M.S. Engineering, Omni University, 2022
- B.S. Applied Physics, Polaris College, 2019

## Skills

Programming (Python, LuaLaTeX), data visualization, technical writing, systems integration.

## Publications

Selected technical articles available upon request.
