

Taylor Rivera

Principal Systems Engineer

Berlin, Germany | taylor.rivera@example.com

github.com/tayrivera • linkedin.com/in/tayrivera

Systems engineer specializing in automation, documentation, and cross-functional leadership within distributed R&D teams.

Profile

Multidisciplinary engineer with experience across software, hardware, and technical communication. This CV demonstrates black and white customization settings.

Experience

Lead Engineer, Omni Labs

- Designed end-to-end automation workflows for LaTeX publishing pipelines.
- Led a cross-functional team delivering multi-document template suites.

Systems Engineer, Aurora Dynamics

- Built simulation models for guidance and navigation control.
- Authored technical reports and process documentation.

Education

- M.S. Engineering, Omni University, 2022
- B.S. Applied Physics, Polaris College, 2019

Skills

Programming (Python, LuaLaTeX), data visualization, technical writing, systems integration.

Here's a code example to show the black and white styling:

```
1 def calculate_trajectory(velocity, angle):  
    """Calculate projectile trajectory"""  
    import math  
    g = 9.81 # gravity  
5    vx = velocity * math.cos(math.radians(angle))  
    vy = velocity * math.sin(math.radians(angle))  
    return vx, vy
```

Publications
