Abstract

We present an inline-layout research article template that mirrors arXiv-style first-page composition with metadata and abstract placed beside each other.

Keywords: Inline Research, OmniLaTeX, arXiv Style

1 Introduction

This inline research paper template demonstrates how metadata, abstract, and keywords are presented at the top of the first page without a dedicated title page.

2 Preliminaries

Provide theoretical background and notation that is required for the remainder of the paper.

3 Method

Describe the proposed approach in detail, including assumptions, algorithms, and theoretical guarantees.

4 Results

Summarize experimental outcomes or analytical findings supporting the method.

5 Conclusion

Highlight key takeaways and outline future research opportunities.
